▨ Logging Level Quick Reference

INFO

Use for **normal flow milestones** a tester/business cares about.
✔ Flow entry/exit
✔ Major success path actions
✔ State changes

Examples:

- [FLOW] Starting login flow
- [LOGIN] WWID submitted
- [WORKITEM] 52823864 – starting CREATE NEW WORK ITEM

DEBUG

Use for **developer details** that are too noisy for normal runs.
✔ Element locators, counts, raw values
✔ Minor UI interactions
✔ Internal checks

Examples:

- [DEBUG] [LOGIN] Typing email: user@domain.com
- [DEBUG] [WORKITEMS] collected 3 item(s)
- [DEBUG] [COMPLAINT] searching for existing PM complaint

WARN

Use for **recoverable issues** or expected-but-absent cases.
✔ Timeouts that don't stop the flow
✔ Skips/optional dialogs
✔ Missing but non-fatal UI

Examples:

- [WARN] [LOGIN] Stay signed in dialog not found
- [WARN] [LOGIN] WWID field not found — may not be loaded
- [WARN] [COMPLAINT] 52823864 – no complaint tiles found
